

PROTECT YOUR INVESTMENT

WITH A FRONT SPLITTER PROTECTOR FROM SCRAPE ARMOR®

The ground-hugging styling of your Camaro draws admiring stares from passersby. It also attracts unwelcome road hazards. Now you can help protect the front underside of your investment with a Front Splitter Protector from Scrape Armor®. Specifically engineered for your Camaro, it's the first line of defense against parking curbs, steep driveways, potholes and other road obstacles.

Constructed of Teklite™, a lightweight, strong polymer that expands and contracts at the same rate as the front bumper, the Front Splitter Protector ensures a perfect fit in any weather. It also features a patented Glidetek™ rail design that reduces contact surface area by more than 50 percent for optimal protection. Additionally, the Eliptek™ edge profile ensures aligned contouring on the front and rear edges, helping to prevent getting hung up on parking curbs or other obstacles.
